# Solar-powered irrigation for patios, balconies, terraces and decks.

## GARDENA AquaBloom Kit.

A clever, automatic watering solution is now available for when you previously had to leave plants on your patio, balcony, terrace or deck unattended. Solar-powered GARDENA AquaBloom Kit works without electricity or a tap and provides plants in boxes and pots with an optimal supply of water. Ideal for when you are travelling, on holiday or throughout the whole season. Plant care for when you're not there.

NEW AND UNIQUE!

## Special care for house and pot plants

With smaller gardens and house plants growing in popularity, clever watering solutions that make the most efficient use of available space and resources are more important than ever.

The GARDENA AquaBloom Kit is unique, and offers an excellent automatic watering solution for areas without access to a tap and electricity.

AquaBloom is perfectly suited to anyone who wants their plants to have the best of care when they cannot be there.

### Solar-powered

Place the main unit in a sunny position and the solar power will charge the batteries. The combination of the solar panel and rechargeable batteries ensures that the plants will be irrigated all season long, even in overcast weather conditions.

### No water tap or mains power

Neither a tap connection or power socket are required in the outdoor space. The AquaBloom Kit just needs a water reservoir as the source for watering the plants.

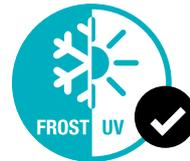

### Tool-free installation

Easy 5-step set-up. Supplied ready-to-use with all necessary components. Includes 3 x AA rechargeable batteries.

# AquaBloom Kit

The solar-powered irrigation kit - perfect for patio, balcony, terrace and deck gardens.

**Solar-powered**  
No power or water tap connection needed.

**3-in-1 main unit**  
**Power - programme - pump**  
Power: the solar panels charge the batteries.  
Programme: select from 14 predefined watering programmes.  
Pump: the integrated pump conveys the water to the plants.

**Ready-to-use kit**  
All necessary components are included.

**Easy 5-step set-up**  
Tool-free installation.

**Water up to 20 x plants**  
20 x pressure equalising inline drip-heads are included in the set.

**Rechargeable batteries**  
3 x AA (1.2V) rechargeable batteries included.

**Flexible placement**  
Position on a wall, table, floor or pot.

## Waters up to 20 plants equally

The high-quality micro-drip components guarantee even water distribution via pressure-equalising drippers. Even when the plants are not positioned at the same height, every plant gets the same amount of water.

## True independence

Place the control unit on a wall, table or pot, to best catch the sunshine. The solar panel charges the batteries in the control unit, to operate the integrated pump, which feeds the water from a reservoir or bucket, through a filter, to the drippers.

## Well cared-for, healthy plants

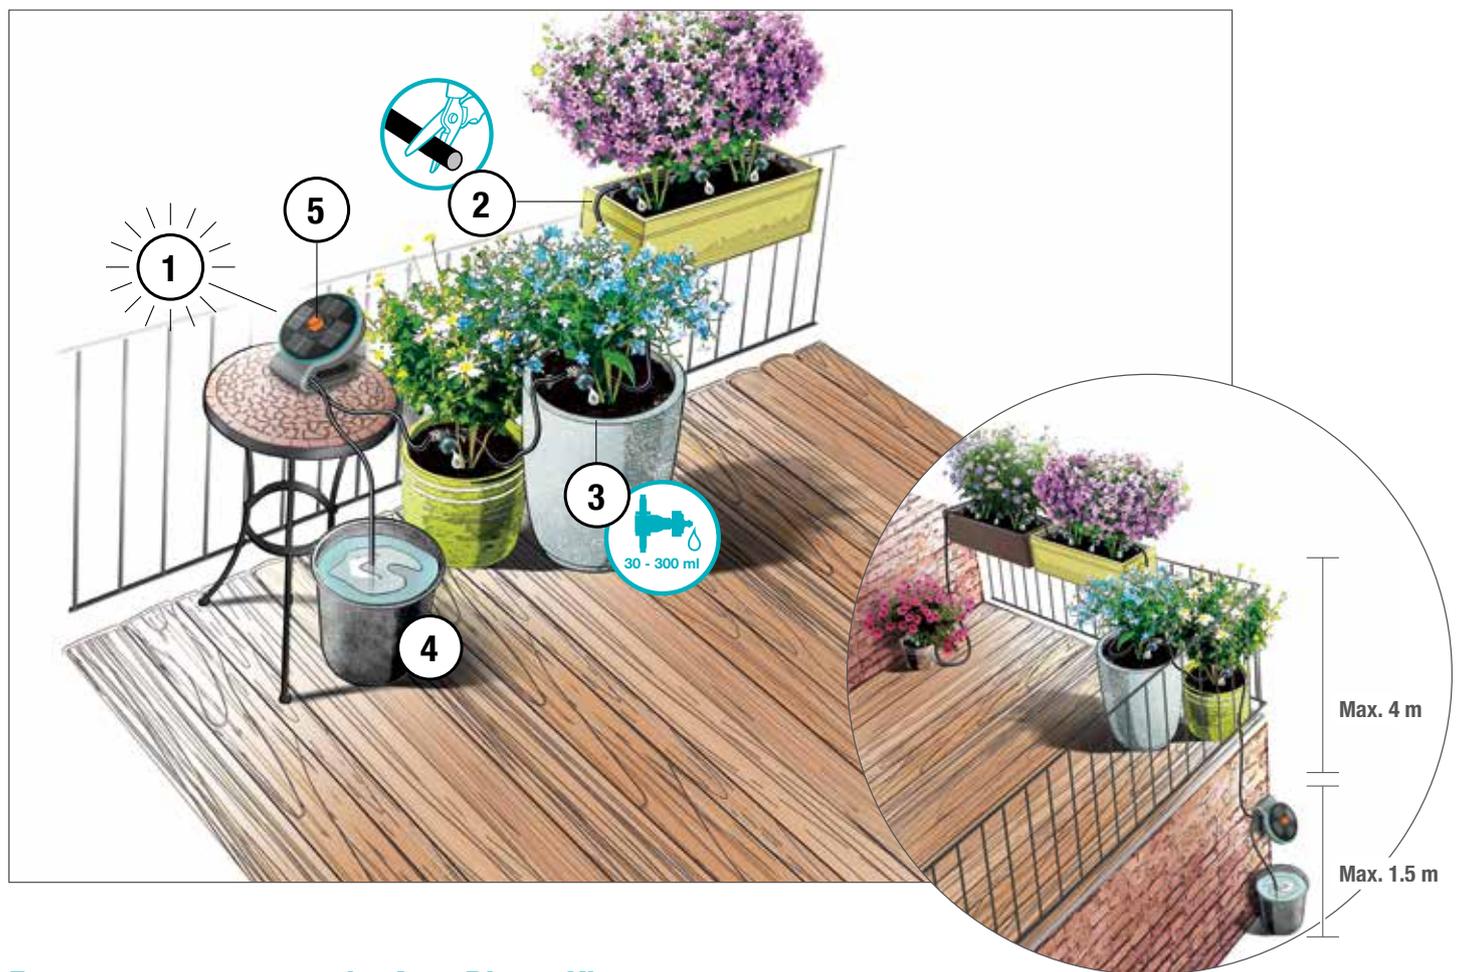

Thanks to the 14 different watering programmes and the micro-drip system, the plants will get the ideal amount of water at the right moment. The water penetrates to the exact point where the plant needs it: the roots.

# Flexible set-up. Even water distribution. Tool-free installation.

Simple and intuitive.

Taking care of plants has never been so easy and efficient.

- Place the control unit on a wall, table, or pot, to best catch the sunlight.
- The solar panel charges the batteries in the control unit, to operate the integrated pump.
- The pump quietly feeds the water from a reservoir or bucket, through a filter, to the drip irrigation system.
- Each pressure-compensating dripper allows an irrigation of up to 300 ml per 35 min. programme.
- Even water distribution is also possible with plants placed at different heights.

## 5 easy steps to set up the AquaBloom Kit:

① Place the control unit in the sun.

② Cut the tubes to the right length.

③ Position the drippers with the plants.

④ Fill the water bucket.

⑤ Select and set the watering programme.

## Complete solution - everything included in the box.

### AquaBloom Kit

<b>Article No.</b>	13300-20
<b>Part No.</b>	967999001
Barcode	 4 078500 049481
Application	For even watering of up to 20 x plants.
Activation of irrigation	Control unit equipped with an integrated solar panel, water pump, timer - 14 x selectable programmes.
Watering programme	Choose from 14 x pre-defined watering programmes.
Water flow rate	Per pressure equalising Inline Drip Head: 500ml /h, 300ml /35min programme.
Energy supply	Solar panel powers 3 x AA rechargeable batteries.
Water supply	The integrated pump draws in the water and distributes it to the plants via the drippers.
Contents	1 x main unit with integrated solar panel and pump, 20 x pressure-equalising Inline Drip Heads, 15 x 3/16" Pipe Pegs, 3 x rechargeable AA Batteries (1.2 V), 2,400 mAh, 8 x 3/16" T-Pieces, 8 x 3/16" Plugs, 1 x Filter, 20m 3/16" Tube.
