How to control weeds naturally!

By Charlie Albone

*You'll want to get rid of weeds as quickly as possible, because they are sapping nutrients and water in your soil - and if the weeds are getting them your plants aren't! Personally, I prefer to use a natural weed killer such as **Richgro Beat-A-Weed** because I know it's safe to use around my veggie patch and around kids and pets when dry.*

Control

Why try **Beat-A-Weed**?

Because it will get rid of those weeds as effectively as any other weedkiller on the market and will do so without harming our environment.

I/N: 3010287

Apply

Spray to ensure complete coverage of unwanted plants to the point of run-off. Optimal results are achieved when Richgro Beat-A-Weed Natural Weedkiller is applied in full sun to small, actively growing plants. It must come into contact with the green parts of the plant.

Results

Beat-A-Weed works by dehydrating the plant burning it from the top down. Results are seen within hours if applied as directed with leaves browning and wilting. It is made of natural actives Acetic Acid and Sodium Chloride, both non-toxic to animals and humans.

Dandelion

Milk Thistles

Creeping Oxalis

Capeweed

Wireweed

Also for Couch Grass, Flatweed and Kikuyu. Controls moss and algae.
