SAFETY TIP
When assembling or installing this product wear protective gloves and eyewear

YOUR HEADACHE-FREE GUIDE TO RACK IT LIKE A BOSS

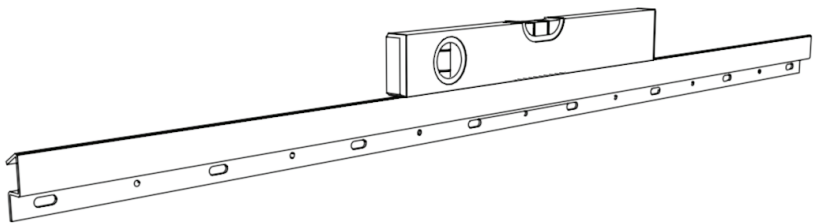

You’ve got this! We know because you take pride in your passions. Take care of your stuff. That’s why you purchased this Rack It 900mm WALL Starter Kit. You’re particular. And we like that. Because we know you’ll take the time to check off all the Parts listed below and to read through these Assembly Instructions before you start. Cue Farnsey (or Beyoncé – whatever lifts you). **Let’s get this Starter Kit started.**

PARTS LIST:

 10 x Self Tapping Screws	 1 x Rack It WALL Hang Track 1029MM	 2 x Rack It WALL Beam 949MM	 1 x Rack It WALL Wire Shelf 900 X 600MM
 Plaster Board and Dyna Bolt fixings	 2 x Rack It WALL Brackets	 2 x Rack It WALL Double Slot Wall Strips 1029MM	 2 x Shelf Support Brace 612MM

STAGE 1: TRACK IT

STEP 1 Pick a wall. Not just any wall. The one your new Wall Unit will call home. Grab your trusty Stud Finder (meep-meep) and a Pencil, and find and mark at least 2x studs. Place your Hang Track on the wall across your stud markings and use a Spirit Level to (you guessed it) check your Track is level at your desired height. Mark all the screw positions with your Pencil (make sure at least 2 of them are over studs), then your Spirit Level can knock off for the day.

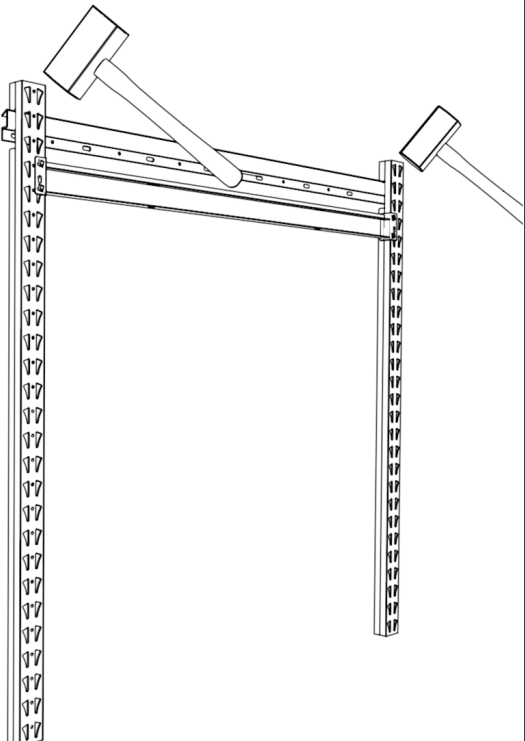

STEP 2 For any screw positions that don't hit studs, insert Plasterboard Anchors by pushing them into the plasterboard and tightening with your Screwdriver. Secure the Hang Track by inserting Screws through the Screw Holes into the Plasterboard Anchors and tighten by hand. For the Screws that hit the studs, you'll need to use an Electric Drill.

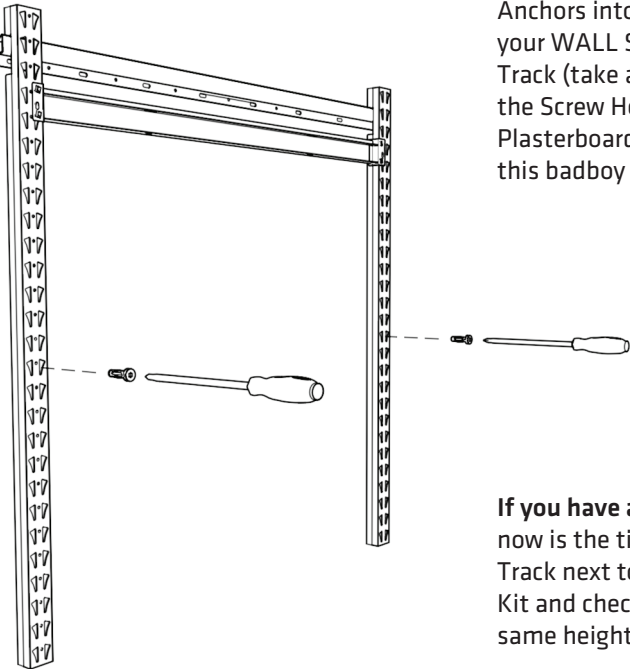

STAGE 2: HANG IT

STEP 1 Hang both WALL Strips to each end of the Hang Track (as shown). Attach a Back Beam to the back of the Wall Strips at your desired height. Gently does it here, as your Wall Strips aren't yet fixed to the wall. Tap into place with a Rubber Mallet (or gently with a Hammer).

STEP 2 Use your Pencil to mark the screw points onto your wall. Then remove your WALL Strips from your Hang Track so you can insert Plasterboard Anchors into the screw spots. Put your WALL Strips back on the Hang Track (take a second here to check the Screw Holes line up with your Plasterboard Anchors) and Screw this badboy onto the wall.

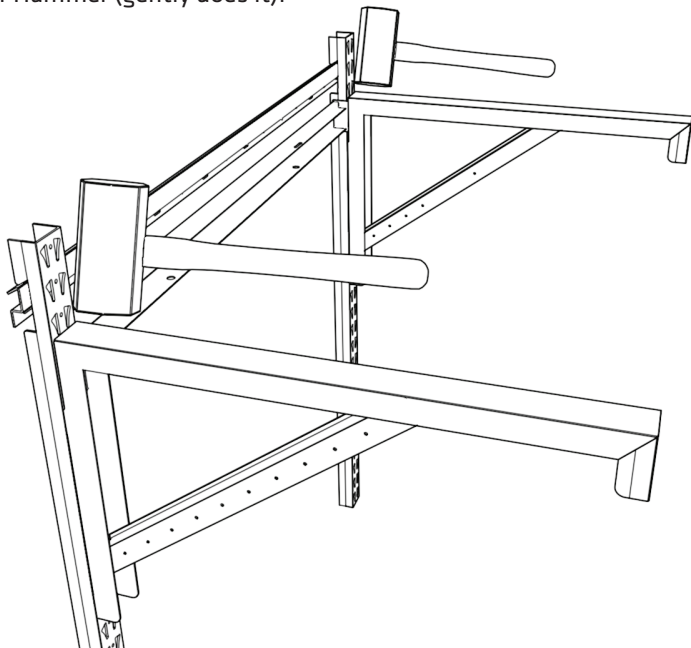

If you have a Rack It Add On Kit, now is the time to fix the Hang Track next to your Rack It Starter Kit and check it is level at the same height.

STAGE 3: RACK IT

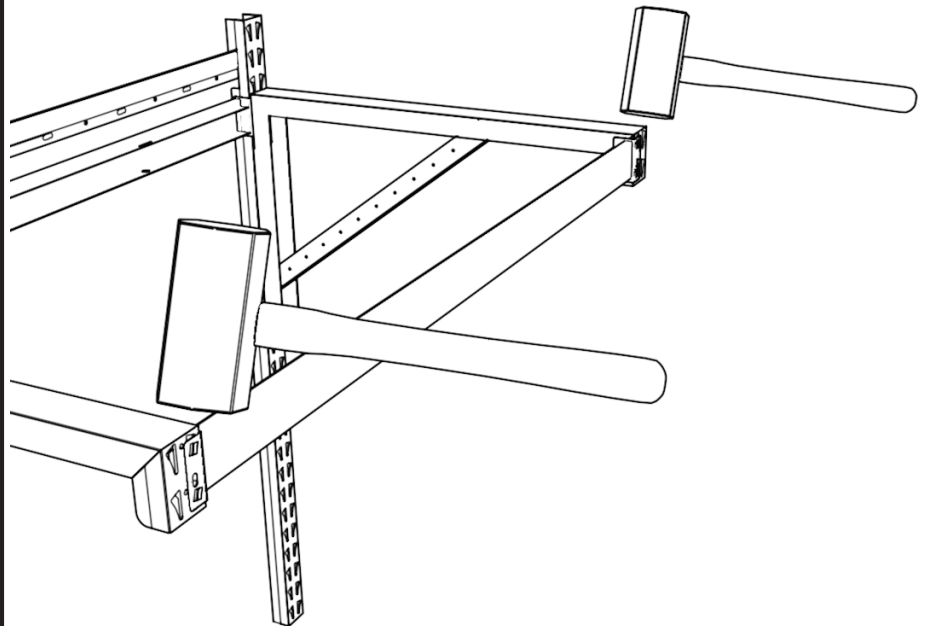

STEP 1

Hook both of your Brackets onto the Wall Strips (as shown) so that the top of the Bracket lines up with your Back Beam. Tap tap with your Rubber Mallet or Hammer (gently does it).

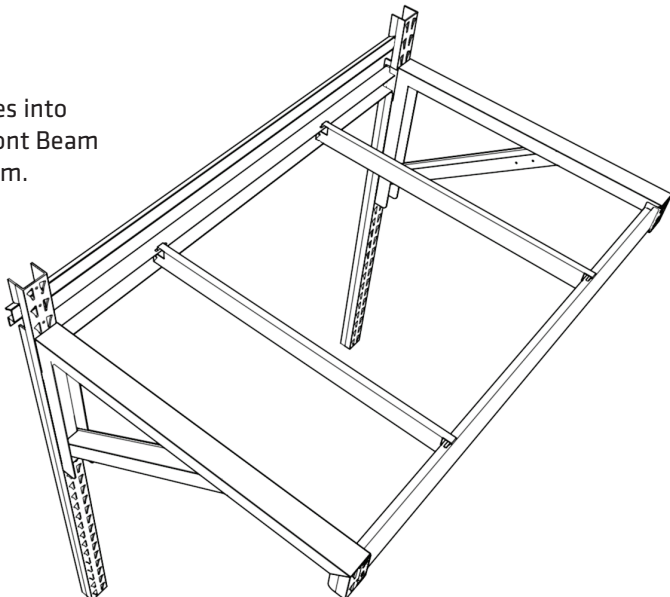

STEP 2

Hook your Front Beam onto your Brackets. Tap tap with your Rubber Mallet or Hammer (gently does it), and fix in place with the Screws provided.

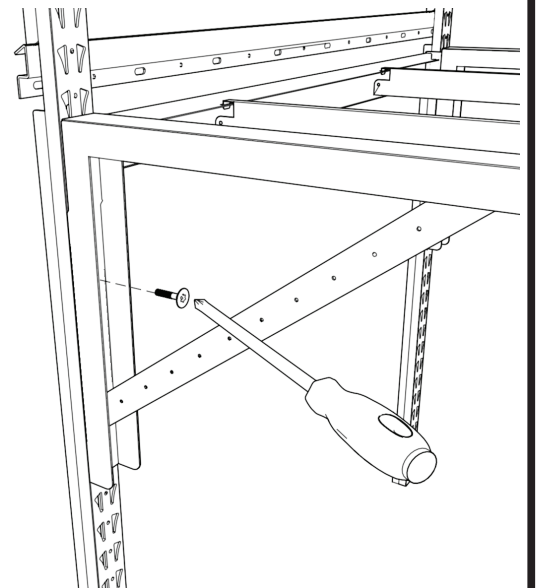

STEP 3

Slide your Support Braces into place: one end in the Front Beam and one in the Back Beam.

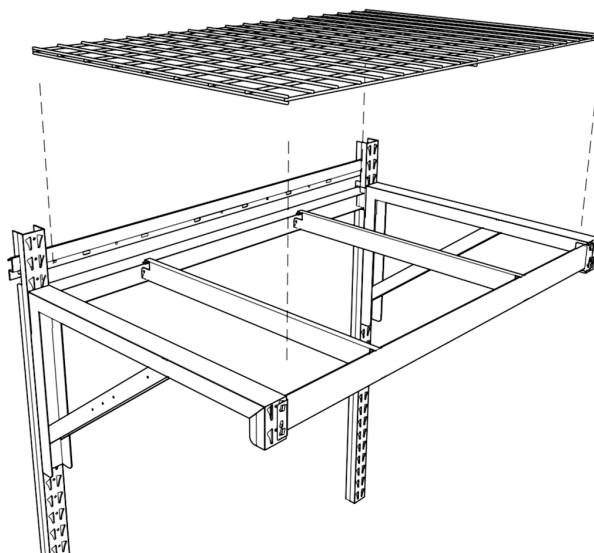

STEP 4

Once you're happy with the height and that all the Brackets, Braces and Beams are in place, fix your Brackets off with the Self-Tapping Screws provided.

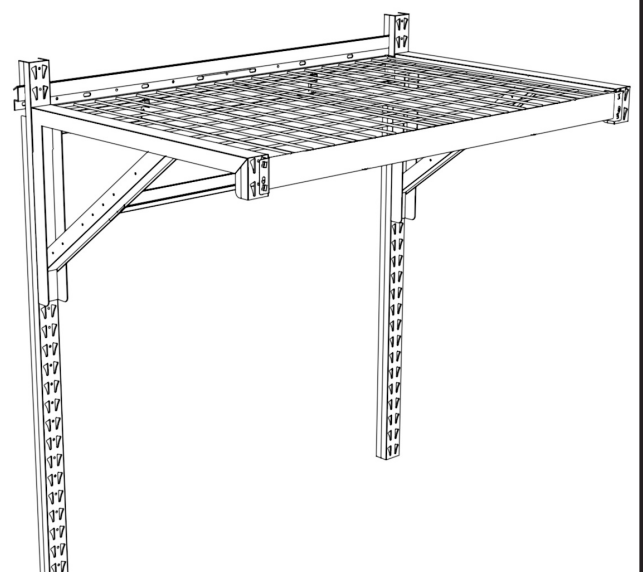

STEP 5

Place your Wire Shelf on top and, voila! Your Rack It 900mm Wall Starter Kit is done.

You've done it! Cue warm inner feeling of satisfaction.

Stand back and marvel at your Rack It 900mm WALL Starter Kit. Now all that's left to do is stack up to **100kg** of your precious stuff on top. Now is also the time to enjoy tossing these instructions in the recycling.

And, don't forget, if you love your new WALL Unit so much you just want to store all your best stuff up top, check out our Add On Kit before you get carried away and overload this one. We knew you had it in you!
