# A New Zealand Favourite

Bestwood Melamine has been a favourite of New Zealand interior designers, architects and joiners for nearly 40 years. The go-to surface for kitchen and bathroom cabinetry, residential and commercial joinery, it can take just about anything life throws at it.

Our range of easy care, pre-finished, double sided panels are available in a large range of designs, finishes and substrate options.

Bestwood Melamine has Environmental Choice NZ Certification, giving you assurance that this New Zealand made product leaves a minimal footprint. With a 10 year warranty you can be sure you are buying a product with a proven performance history.

# New Additions

We've cherry picked the best of the European design trends and combined those with input from New Zealand's leading architects and designers to bring you nine gorgeous new designs.

Included are six stunning woodgrain designs that look incredible when paired with our new Timberland plate finish – a huge step up in realism in both touch and texture. Three additional designs have been chosen to complement both the woodgrains and each other. Make sure you check them out on the following pages.

## DESIGNS

# Finishes

Because we make our melamine panels to order, we can offer a choice of finish textures for any colour in our range – this is applied when the melamine paper is heat-pressed onto an MDF or particleboard substrate.

With the introduction of our Timberland plate we now have five finish options across all our colours. A gloss or gloss-plus finish is available on Arctic Ice only.

TIMBERLAND

See and feel the difference with our deeply textured and realistic Timberland finish. Available over all colours in the Bestwood range, it looks superb on all our woodgrain decors, but also when pressed on darker colours such as Black or Carbon.

*Not available in 1800 wide.*

EMBOSSED

A lightly textured orange-peel-like surface with good scratch resistance.

VELVET

A delicate, low sheen eggshell surface.

WOODGRAIN

A natural grain texture simulating that of timber.

*Not available in 1800 wide.*

WILDERNESS

A textured grained surface with a linear timber effect.

*Not available in 1800 wide.*

# Think Big

## With 1800 wide panels

For commercial projects such as office desking or for wall panelling, our 1800-wide panel may be a more economic option than our standard 2440 x 1220mm size.

Bestwood offers seven colours in a wider 2440 x 1830 panel or 1830 x 1830 panel. These can be pressed on four different thicknesses – 12mm, 16mm, 18mm and 20mm. Note that Arctic White is designed primarily for the interior of drawers and shelves, and priced accordingly. It does not form part of our colour melamine offer.

ARCTIC WHITE

MIST GREY

BLACK

WASHED OAK

PERFECT OAK

VINTAGE ASH

PERFECT TAWA

Standard 2440 x 1220 panels are available across the entire Bestwood Melamine range. All our New Zealand-made MDF panels are rated EO for formaldehyde and come in a range of thicknesses. Our particleboard is rated E1. To check panel sizes and thicknesses, just visit the Technical Resources page of the Bestwood website.

# Beautiful on the inside too...

The demand for coloured cabinetry interiors has been growing strongly. Catering for this is our Etched Graphite design with a scratched metal effect that has been matched to Hettich hardware and which is priced below our standard colour range.

Embraced by some of New Zealand's leading designers as a refreshing change away from white, coloured melamine interiors, especially woodgrains, provide a more family-friendly and practical surface.

# Bestwood Edging

Bestwood has its own range of matched edging for every colour in the Bestwood Melamine range. Thinner is better when it comes to edge tape and we offer an expanded range of 1mm edging plus laser edgetape for selected colours.

To view what's available for any specific colour, either click on the colour swatch on the melamine page of our website, or use the edging filter at the top of the page. A full edging chart can be viewed or downloaded from the Technical Resources page of our website at [www.bestwood.co.nz](http://www.bestwood.co.nz)

# Care Instructions

Bestwood Melamine is easy to care for and daily cleaning requires no more than a wipe with a damp cloth and hot soapy water. For tougher stains we recommend trying:

Substance	Remedy
Wine	Hot soapy water
Rust	Diluted vinegar or lemon juice
Shoe polish	Diluted vinegar or lemon juice
Oven cleaner	Hot soapy water
Tea	All-purpose surface cleaner
Foodstuffs	All-purpose surface cleaner
Fabric dye	Cold water, wipe dry, then use methylated spirits
Felt pen	Methylated spirits or acetone
Paint/glue	Acetone
Heavy wax & grease	Xylene
Hair/leather Dye	Methylated spirits

- After using the solutions recommended, always wipe with a damp cloth, then a dry cloth.
- We also recommend caution in using bleach and alcohol -based cleaners. Dilute bleach (1 part bleach/ 3 parts water).

# Warranty

Bestwood Melamine is made here in New Zealand with back-up for any issues close at hand. It's a very durable surface and we offer a 10 year warranty – subject to normal use conditions. To view a full copy of the warranty, please download from our website at [www.bestwood.co.nz](http://www.bestwood.co.nz)

## LIMITATIONS OF USE

Bestwood Melamine is designed for interior use only and should not be used in areas where it will be exposed to high moisture levels i.e. as an exterior wall lining, or wet areas in regular contact with water. It is not suitable for benchtops in kitchens and bathrooms.

# Online Help & Samples

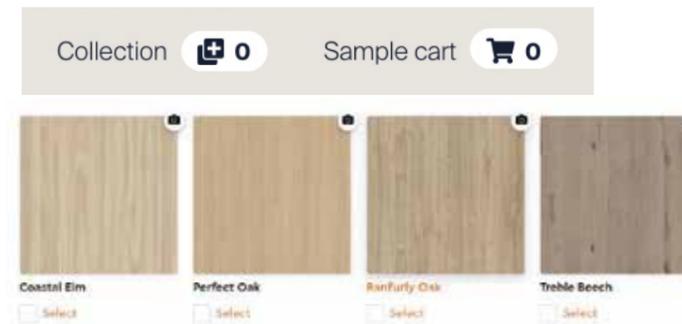

At [bestwood.co.nz](http://bestwood.co.nz) our digital front door is open 24/7. You can view our entire melamine range, order samples, view or download technical documents and more.

Here's some features you may find handy.

## 1. ORDER SAMPLES OR CREATE A COLLECTION

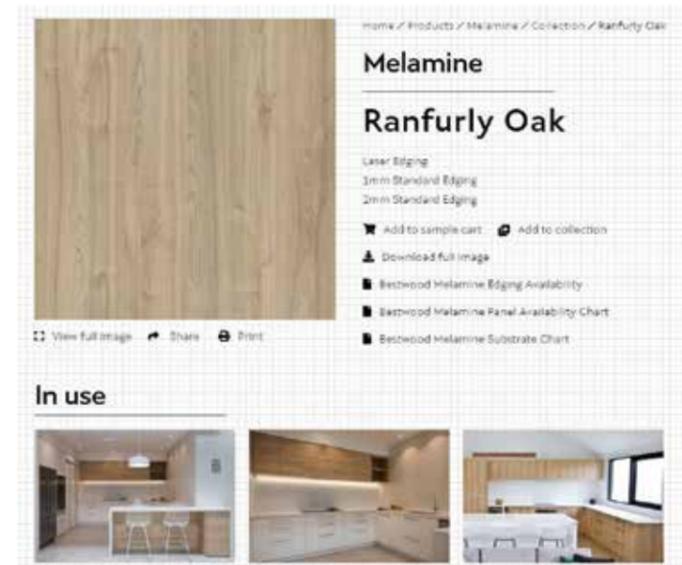

Just use the tick box below any swatch to add it to your Sample Cart or add it to a Collection. Use the checkout cart at the top of the page to have our Samples team despatch your samples to you at no cost.

You can also 'add to your 'Collection' any relevant swatches, images or technical documentation. From your Collection you can download or share the information with anyone you choose.

## 2. VIEW INSTALLATION IMAGES

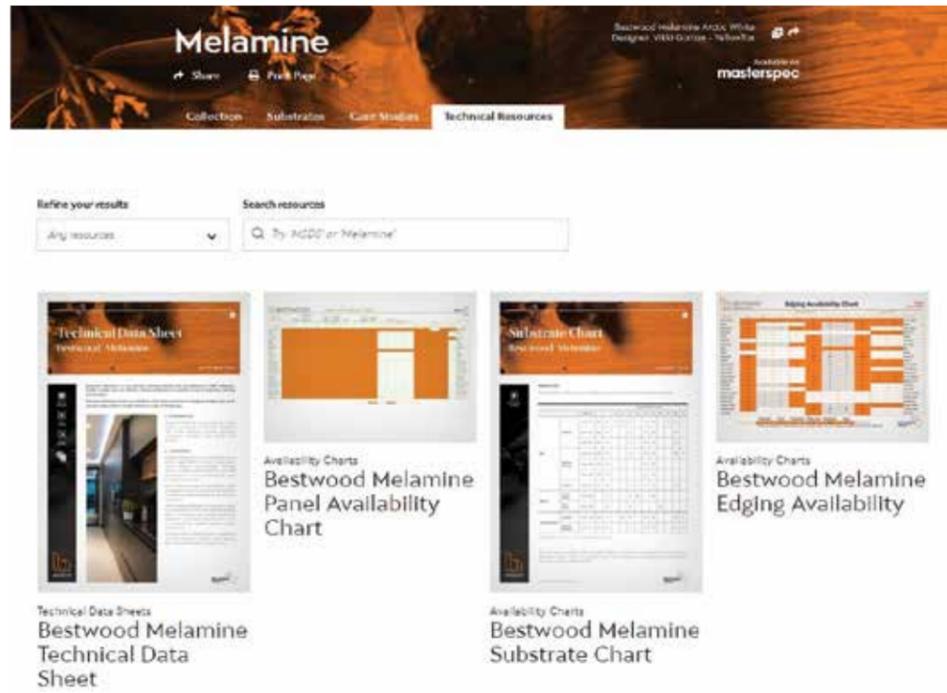

If you see a camera icon on top of the swatch, it means installation images exist for that colour. Just click on the swatch to view these and any additional information about that melamine. You can also download a high resolution image of the full design to use for 3D renders in design programs.

# Online Help & Samples (cont)

## 3. COMPREHENSIVE TECHNICAL RESOURCES

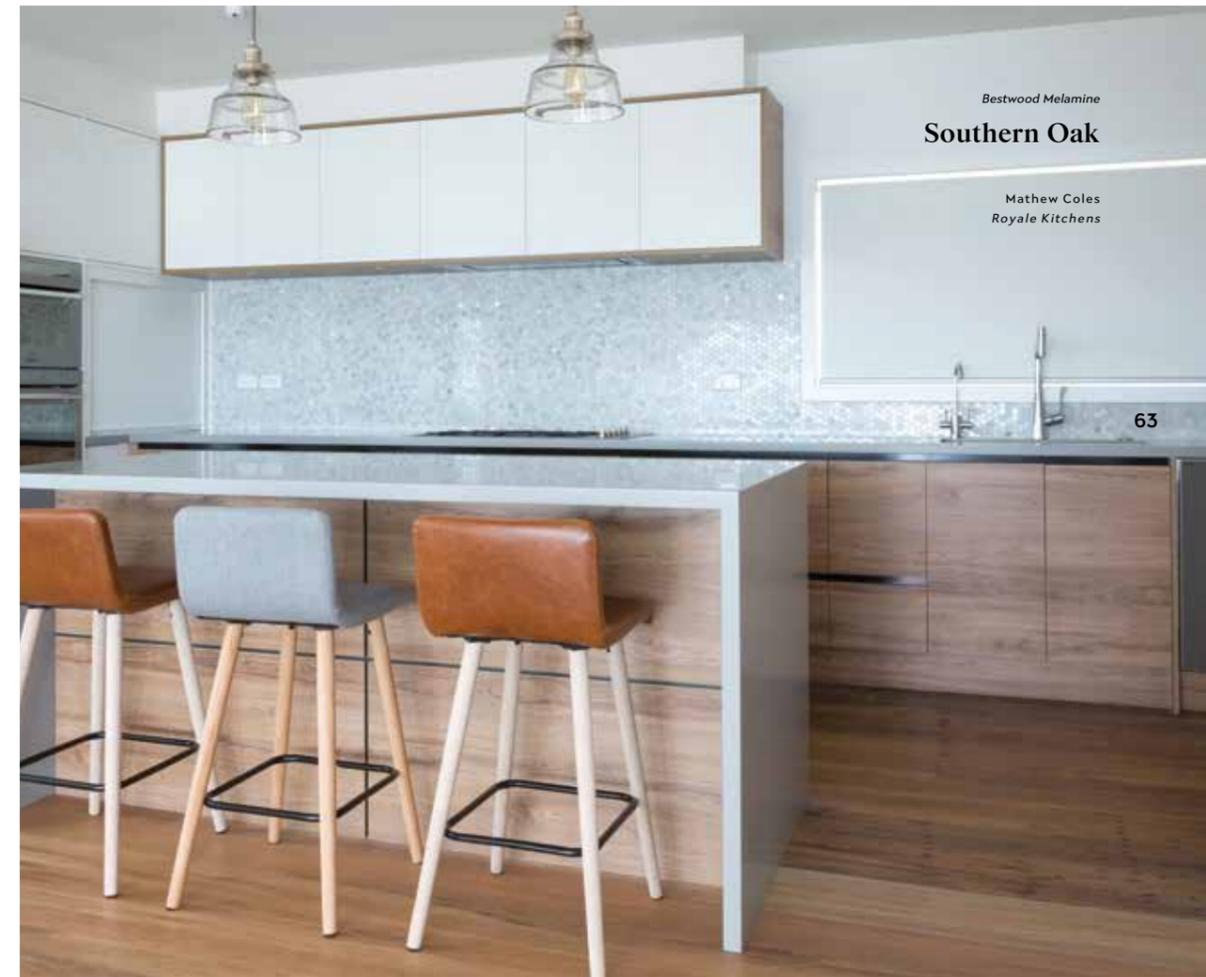

Accessible from either the main Technical Resources page or the Melamine product page, you can select which technical resource you need using the filters at the top. Our resources are always current and feature Technical Data Sheets, MSDS, warranty information, brochures, availability charts, board and folder layouts and other associated information.

# Where to get more help

Bestwood sells its products to the joinery industry through a range of joinery and hardware merchants – you can locate a supplier by using the search function on the Contact page of our website.

If you're a design professional wanting assistance, then please contact one of our experienced specification managers - details of our team are on the website. Samples can be easily ordered online via the melamine colours page of our website.
