

DIRECTIONS FOR USE

THESE APPLY TO ALL MORTAFIL PRODUCTS.

- ENSURE SURFACES TO BE TREATED ARE FREE FROM GREASE AND FLAKING MATERIALS.

SURFACES MUST BE TOTALLY DRY

- IF USING THE MORTAFIL CARTRIDGE IT IS IMPORTANT TO MAKE SURE PLASTIC NOZZLE IS CUT ON AN ANGLE AT LEAST **2.5CM OR 1"** BEFORE CAULKING BEGINS
- MORTAFIL BONDS FIRMLY TO MOST BUILDING MATERIALS INCLUDING BRICKS, LIMESTONE, MORTAR, CONCRETE, WOOD, CHIPBOARD, ALL KINDS OF METAL, CERAMIC TILES, PLASTER BOARD, HARDIFLEX, POLYSTYRENE ETC.
- FILLING DEEP VERTICAL GAPS, ENSURE YOU DO NOT OVERFILL THE GAP SO PRODUCT DOES NOT FALL OUT, RATHER 1/2 FILL THE GAP LET IT DRY AND FINISH WITH THE LAST COAT. THIS WAY YOU WILL ENHANCE THE BONDING & FLEXIBLE PROPERTIES THAT ARE UNIQUE TO MORTAFIL
- ALLOW A MINIMUM OF 1HR DRYING TIME DEPENDING ON THICKNESS OF GAPS FILLED. IN SHADY AREAS, COLD WEATHER ETC A LONGER TIME IS REQUIRED.
- IF USING AS A GROUT OR REPLACING MORTAR IN PAVED AREAS, MASK OFF SURROUNDING AREA TO GET A CLEAN FINISH AND AVOID SPILLS DRYING ONTO OTHER SURFACES. REMOVE MASKING TAPE AS SOON AS AREA IS FILLED. OR IN THE CASE OF UNIQUE-COATING OR MULTICOAT, PAINTED ON.
- DO NOT USE WATER FOR THINNING ANY OF THE MORTAFIL PRODUCTS. WE RECOMMEND MORTAFIL REDUCER / SEALER
- BECAUSE MORTAFIL IS ALSO AN ADHESIVE, IT CAN BE USED TO LAY CERAMIC TILES OVER OLD CERAMIC TILES, ATTACH MOULDINGS, GLUE DIFFERENT MATERIALS TOGETHER. IT IS 4 TIMES STRONGER IN ADHESION THAN CEMENT.

"MORTAFIL" IS 100% AUSTRALIAN OWNED AND MADE.
