

Comfort Maker Heat Transfer Range

Comfort Maker has the right ventilation product to make your home more comfortable.

Many homes rely on one heat source* situated in the main living area, to provide warmth for the entire home. This creates a lot of heat directly in that room, and as warm air rises, the excess heat is trapped at ceiling level, while the rest of house stays cold. Comfort Maker Heat Transfer Kits are the perfect solution for transferring surplus heat

from the warmed room to one, two or three other rooms for a healthier home and more energy efficient heating. The transferred air will then recirculate, creating a continual movement of warm air throughout the home, reducing condensation, mould and mildew.

Three Room Heat Transfer

Order code FAN0846

150mm Mixed Flow Fan (166 l/s, 597m³/hr)
1 x Eggcrate Inlet Grille
3 x Adjustable Circular Outlet Diffusers
5 x 3 metres 150mm Insulated Duct

Thermostat Options

A room thermostat offers control over your desired comfort level. Installed in the same room as your heat source, simply set your desired temperature and once the warmed room exceeds this temperature, the system will automatically begin transferring the excess heat into the other rooms in your home.

Order code FAN5555

Touch Screen Controller with timer function and automatically adjusted fan speed to set level.

Order code FAN5856

Mechanical Controller with automatically adjusted fan speed to set level.

*Where a gas appliance is your heat source refer to the Building Code: Section G4/ 2.2 or your gas heating installation company.

Comfort Maker Heat Transfer systems are available in either thru-wall, 1, 2, or 3 room kits, and are backed by a 2 year warranty.

Comfort Maker Extraction Range

Exhaust Fans

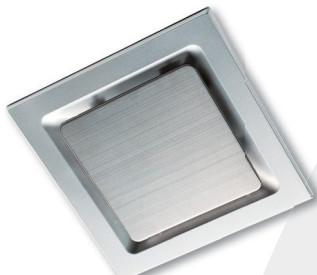

Designed for bathrooms, ensuites, toilets or other rooms that require ventilation, these units include stylish finishes with removable fascias for easy cleaning. Their low overall height allows for installation in confined spaces. These systems have long life ball bearing motors and come with the duct outlet included. Fans without an LED light are also supplied with a plug and lead.
