

# Heated outdoor jacket

## for work and leisure

### The right size clothing –

Pay attention to these points:

- A Chest measurement:** Put the tape measure horizontally around the widest part of your chest. Example: if your chest measures 102 cm, select a jacket with chest measurement of 106 cm (always round measurements up). If you wear a pullover under the jacket, select the next size up, i.e. a jacket with chest measurement of 112 cm.
- B Height / Back length:** Put the tape measure vertically from your neck to your coccyx.
- C Arm length:** Put the tape measure from your wrist to your shoulder.
