FAQs

What is an S Trap and what is a P Trap? This refers to where your waste exits the bathroom. An S Trap pan has a waste pipe that is connected to the floor. A P Trap pan has a waste pipe connecting directly to the wall.

Is there an S Trap Pan Connector included? Yes.

Is there a P Trap Pan Connector included? No, this can be purchased separately.

Does this item meet the required Australian Standards? Yes.

What does S Trap adjustable setting distance refer to? This is the measurement your installing plumber needs to know for S Trap installations. The measurement is taken from the wall to the centre of the waste outlet in your floor. A P Trap's installation height is fixed at 180mm.

Are the valves preinstalled? Yes, however, we recommend checking for leaks once installed.

Can a bottom entry inlet valve be installed on the left or right side? Yes.

Can a rear / top entry valve be installed? Yes, but it is sold separately.

Can toilet cleaners be used in the cistern (such as cakes or cleaning product)? No, this will cause damage to Valves & Washers.

How is the toilet pan fixed to the floor? A floor fixing kit is provided, apply a bead of sealant (Wet Area Silicone) around the base of the pan. Alternatively a Mortar Bed can be used to help level the pan on the floor if required.

Can offset pan collars be used with the installation of this product? No, offset pan collars affect the flushing performance and are not recommended or warranted.

All dimensions in millimetres (mm) and subject to manufacturing tolerances.

Vitreous China items are subject to manufacturing tolerances and could vary in size from batch to batch. It is industry accepted that a variance of $\pm 5\text{mm}$ is considered normal. It is recommended to have the Vitreous China item on hand prior to any setout work.
