

10400 Litre Round Water Tank

Shown in
Wheat

Built to the highest of Australian standards, this round water tank has been designed to be durable, in order to withstand the harsh Australian weather.

One of our largest round water tanks currently available, this unit will capture and store a massive 10400 litres of rain water. Ideal for large gardens and big household water consumers.

- Built to last, using UV stabilised food grade polyethylene. BPA free.
- Complies with AS/NZS 4766 standard for above ground tanks.
- Tap outlet locations can be customised to suit a customer's requirements. See options below:
