## ASSEMBLY INSTRUCTIONS

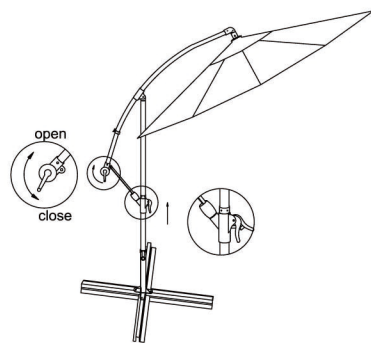

### 3M Cantilever Umbrella

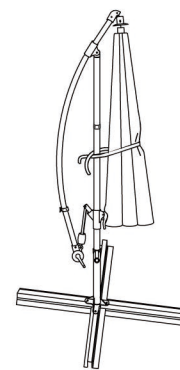

**Step 1:** Place the two base pieces together to form a cross. Attach the base pole to the base and screw tightly with the screws (4pcs) and washers (4pcs) provided.

**Step 2:** Insert the umbrella pole into the base pole. Make sure that the pole is securely fastened into the base pole notches.

**Step 3:** To adjust the angle of the umbrella, move the umbrella up or down using the handle on the main pole. Pull the securing handle down to lock the angle in place.

**Step 4:** In extreme weather conditions ensure the umbrella canopy is closed and tie to the umbrella pole.

#### Operating Instructions:

To open the umbrella, gently pull the canopy open with your hands and then use the wind up crank mechanism to fully open the canopy.

Ensure you wind the handle slowly and carefully to ensure the umbrella opens safely.

Once the umbrella canopy is fully open, do not continue winding, as this may damage the mechanism.

#### Warning:

When opening the umbrella, ensure there is ample space available.

Non-permanent structure. Do not use in extreme weather conditions including heavy rain or high winds.

Do not leave the umbrella unprotected from the weather for long periods of time.

Ensure the steel cross base is appropriately weighed down with concrete pavers.

Damage caused by not following the above mentioned instructions will void your warranty.
